

To all team secretaries,

At the last AGM a committee proposal was offered to eliminate the amount of void "B" league matches taking place each year and ensure a productive match result.

This was subsequently rejected during the democratic voting process and nothing agreed in place.

As match secretary I need our rules to be concise in order that the correct procedure is enforced. I propose the following be adopted for the coming year, but welcome any practical adjustments from each team secretary sent to our league secretary Mark Davies for final acceptance.

Our rules relating to the subject in question are 39 and 47 which attempt to offer clarity but lacks vital points.

So in the absence of a clear directive Rule 39 should read as follows;

39. Each team shall consist of not more than nine shooters.
The five highest scores shall count for the "A" league match score providing each team completes five scores.
The fifth to seventh highest scores to count for the "B" league match score providing each team completes seven scores.
If one team fails to provide the specified number of scores above the match/ matches will not be valid. Only match points will be awarded to non-defaulting team, match statistics will not be recorded but individual scores are.

As the last paragraph of rule 39 refers to a different subject it is suggested this now becomes rule 47.

47. A non-counting shooter, i.e. A. N. Other shall not be allowed to fire if a registered shooter present has not fired, subject to the discretion of team captains. For example, where the registered team shooter has just arrived at the match.

The contents of rule 47 referring to rule 39 is added to rule 39.

Regards
Keith Skidmore (Match Sec) for
NADARL
